

Technical Data Sheet

PE conjugated Cynomolgus Monkey OX40 (C-His)

Catalog Number: 819001, 819002
Size: 25 ug, 100 ug
Target Name: TNFRSF4, OX40, CD134, OX40L receptor
Regulatory Status: RUO

Product Details

Application: FC
Format: Liquid, PE
Expression Host: CHO
Species: Cynomolgus monkey
Sources: Recombinant Cynomolgus Monkey OX40 (Lue29-Ala216) with C-terminus His-tag is expressed in CHO cell and conjugated to PE.
Accession Number: A0A7N9CLL2
Molecular Weight: The protein has a predicted molecular weight of 21.9 kDa. Under DTT-reducing conditions, it migrates at approximately 40 kDa on SDS-PAGE.
Affinity Tag: C-His
Formulation: 1xPBS buffer, pH7.4, 0.09% NaN₃ with a carrier protein
Endotoxin level: Not tested
Protein Concentration: 25µg size is bottled at 0.1mg/mL concentration. 100 µg size is bottled at lot specific concentration.
Storage and Handling: Briefly centrifuge the vial upon receipt. An unopened vial may be stored at 2–8°C for up to six months.

Background Information

OX40 (CD134) and its ligand OX40L (CD252), both part of the TNF receptor superfamily, play a key role in immune regulation. Their interaction is essential for T-cell expansion, survival, and cytokine production, influencing T cells, antigen-presenting cells, NK cells, and NKT cells. OX40-OX40L signaling helps break immune tolerance in malignancies, promoting antitumor immunity, and is also involved in the development of inflammatory and autoimmune diseases. Due to these regulatory effects, the OX40-OX40L pathway is a promising target for therapeutic interventions in both cancer and infectious diseases, with OX40 stimulation showing potential for therapeutic immunization strategies.
