

Technical Data Sheet

Human HexB Protein (C-His)

Catalog Number: 603301, 603302

Size: 25 ug, 100 ug

Target Name: Hexosaminidase B

Regulatory Status: RUO

Product Details

Application: ELISA

Format: Liquid, Purified

Expression Host: HEK293

Species: Human

Accession Number: P07686

Sources: Human HexB (Ala43-Met556) protein with C-terminus His tag is expressed in HEK293 cells.

Molecular Weight: This protein has a predicted molecular weight of 60.1 kDa. Under DTT-reducing conditions, the protein migrates at approximately 65 kDa on SDS-PAGE.

Affinity Tag: C-His

Purity: >95% based on SDS-PAGE under reducing condition

Formulation: 25 mM Tris, 150 mM NaCl, pH 7.5 (0.2 um filtered)

Endotoxin level: Not tested

Protein Concentration: 25µg size is bottled at 0.2mg/mL concentration. 100 µg size is supplied at a lot-specific concentration.

Storage and Handling: Briefly centrifuge the vial upon receipt. An unopened vial can be stored at 4°C for up to 2 weeks, or at -20°C or below for up to six months. The protein may be further diluted to 0.1 mg/mL using 0.22 µm-filtered 25 mM Tris, 150 mM NaCl, pH 7.5. For long-term storage, the diluted stock solution should be aliquoted and stored at ≤ -70°C to minimize freeze-thaw cycles. If additional dilution is required, carrier proteins such as FBS or BSA should be added to maintain protein stability.

Background Information

Beta-hexosaminidases are lysosomal enzymes that hydrolyze terminal N-acetyl-D-hexosamine residues from GM2 gangliosides and globo-sphingolipids. They exist in three isoforms: Hex A (??), Hex B (??), and Hex S (??), formed by different combinations of ? and ? subunits encoded by the HEXA and HEXB genes. Recombinant HexB corresponds to Hex B isoform.

Product Data

Purified HexB (C-His) final product on SDS-PAGE under non-reducing (P-) and reducing (P+) conditions. The purity of HexB appears to be greater than 95%.
