

Technical Data Sheet

HexA-His/HexB-FLAG Heterodimer Protein

Catalog Number: 601001, 601002

Size: 25 ug, 100 ug

Target Name: Hexosaminidase A, Hexosaminidase B

Regulatory Status: RUO

Product Details

Application: ELISA

Format: Liquid, Purified

Expression Host: CHO

Species: Human

Accession Number: P07686/P06865

Sources: Recombinant human HexB (Ala43-Met556) with C-terminus DYKDDDDK tag and human HexA (Leu23-Thr529) with C-terminus His tag are co-expressed in CHO cells. Heterodimer protein is purified sequentially by anti-FLAG tag resin and Nickel resin.

Molecular Weight: Human HexA protein has the predicted molecular weight of 60 kD and human HexB protein has the predicted molecular weight of 59.8 kD . Under DTT-reducing conditions, both proteins migrate at approximately 65 kDa on SDS-PAGE.

Affinity Tag: C-His and C-DYKDDDDK

Purity: >95% based on SDS-PAGE under reducing condition

Formulation: 25 mM Tris, 150 mM NaCl, pH 7.5 (0.2 um filtered)

Endotoxin level: Not tested

Protein Concentration: 25µg size is bottled at 0.2mg/mL concentration. 100 µg size is supplied at a lot-specific concentration.

Storage and Handling: Briefly centrifuge the vial upon receipt. An unopened vial can be stored at 4°C for up to 2 weeks, or at -20°C or below for up to six months. The protein may be further diluted to 0.1 mg/mL using 0.22 µm-filtered 25 mM Tris, 150 mM NaCl, pH 7.5. For long-term storage, the diluted stock solution should be aliquoted and stored at ≤ -70°C to minimize freeze-thaw cycles. If additional dilution is required, carrier proteins such as FBS or BSA should be added to maintain protein stability.

Background Information

Beta-hexosaminidases are lysosomal enzymes that hydrolyze terminal N-acetyl-D-hexosamine residues from GM2 gangliosides and globo-sphingolipids. They exist in three isoforms: Hex A (??), Hex B (??), and Hex S (??), formed by different combinations of ? and ? subunits encoded by the HEXA and HEXB genes. Recombinant HexA-His/HexB-FLAG Heterodimer corresponds to Hex A isoform.

Product Data

Purified HexA/B heterodimer (HexA-His/HexB-FLAG) and final products on SDS-PAGE under non-reducing (P-) and reducing (P+) conditions. The purity of HexA/B heterodimer is greater than 95%.
