

## Technical Data Sheet

### Mouse OX40L Protein (N-Fc)

**Catalog Number:** 604901, 604902

**Size:** 25 ug, 100 ug

**Target Name:** OX40L, TNFSF4, CD252, TXGP1, CD134 ligand, , Glycoprotein Gp34

**Regulatory Status:** RUO

#### Product Details

---

**Application:** ELISA, BLI

**Format:** Liquid, Purified

**Expression Host:** HEK293

**Target Name:** OX40L, TNFSF4, CD252, TXGP1, CD134 ligand, , Glycoprotein Gp34

**Species:** Mouse

**Accession Number:** P43488

**Sources:** Recombinant Mouse OX40L (Gln49-Leu198) with N-terminus Fc tag is expressed in 293 cells

**Molecular Weight:** This protein has a predicted molecular weight of 42.9 kDa. Under DTT-reducing conditions, the protein migrates at approximately 50 kDa on SDS-PAGE.

**Affinity Tag:** N-Fc

**Purity:** >95% based on SDS-PAGE under reducing condition

**Regulatory Status:** RUO

**Formulation:** 1xPBS buffer, pH7.4, 0.22 µm filtered

**Endotoxin level:** Not tested

**Protein Concentration:** 25µg size is bottled at 0.2mg/mL concentration. 100 µg size is supplied at a lot-specific concentration.

**Storage and Handling:** Briefly centrifuge the vial upon receipt. An unopened vial can be stored at 4°C for up to 2 weeks, or at -20°C or below for up to six months. The protein may be further diluted to 0.1 mg/mL using 0.22 µm-filtered PBS buffer (pH 7.4). For long-term storage, the diluted stock solution should be aliquoted and stored at ≤ -70°C to minimize freeze-thaw cycles. If additional dilution is required, carrier proteins such as FBS or BSA should be added to maintain protein stability.

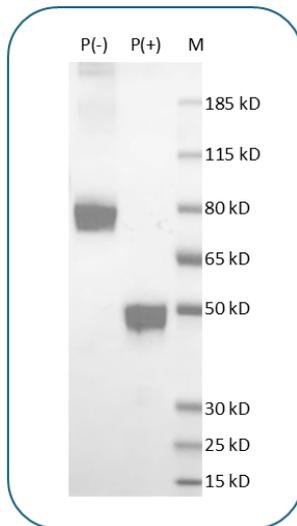

#### Background Information

---

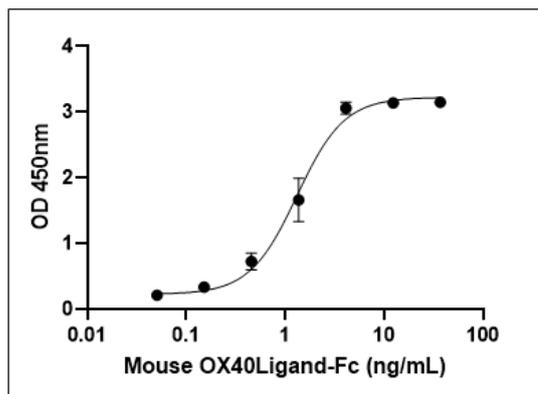

OX40 ligand (also known as CD252) is a member of the tumor necrosis factor (TNF) superfamily and serves as the natural ligand for the costimulatory receptor OX40 (CD134) on T cells. Expressed primarily on antigen-presenting cells such as B cells' dendritic cells, OX40L plays a key role in regulating immune responses by promoting T cell activation, proliferation, survival, and memory formation. The interaction between OX40L and OX40 is critical for sustaining effective adaptive immunity and is a promising target in therapies for cancer, autoimmune diseases, and chronic inflammation.

## Product Data

---

Purified Mouse OX40L Protein (N-Fc) on SDS-PAGE under reducing (P+) and non-reducing (P-) conditions. The purity of the purified protein appears to be greater than 95% based on reducing condition.

Biotinylated mouse OX40 (C-His-Avi) is coated at 2 ug/mL (200 ng/well). Mouse OX40L (N-Fc) can bind mouse OX40 in a dose-dependent manner with the ED50 of 1-5 ng/mL.
