

Technical Data Sheet

Biotin Anti-Human CD81

Catalog Number: 106011, 106012
Size: 25 ug, 100 ug
Target Name: CD81, S5.7, CVID6, TSPAN28
Regulatory Status: RUO

Product Details

Clone: 5A6
Application: FC
Reactivity: Human
Format: Biotin
Isotype: Mouse IgG1
Antibody Type: Monoclonal
Formulation: Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) BSA
Protein Concentration: 0.2 mg/mL
Storage and Handling: The antibody solution should be stored undiluted between 2°C and 8°C, and protected from prolonged exposure to light. Do not freeze.
Recommended Usage: For flow cytometric staining, it is recommended to use less than 0.1 ug of this reagent per 0.5-1.0 million cells in a 100 µL volume. Optimal reagent performance should be determined by titration for each specific application

Background Information

CD81 molecule, also known as CD81 (Cluster of Differentiation 81), is a protein which in humans is encoded by the CD81 gene.[5][6] It is also known as 26 kDa cell surface protein, TAPA-1 (Target of the Antiproliferative Antibody 1), and Tetraspanin-28 (Tspan-28). CD81 is expressed on T and B cells, NK cells, monocytes, dendritic cells, thymocytes, endothelial cells, and fibroblasts. It also has low levels of expression on granulocytes. CD81 induces B cell adhesion via VLA-4 integrin and has been shown to play a role in early T cell development.

Product Data

Human peripheral blood lymphocytes stained with either Biotin Anti-Human CD81 clone 5A6 (blue histogram) or an isotype control (gray histogram) , followed by SA-PE.
