#### Background Information

---

CD3 (cluster of differentiation 3) is a protein complex and T cell co-receptor. CD3? is a 20 kD chain of the CD3/T-cell receptor (TCR) complex which is composed of two CD3?, one CD3?, one CD3?, one CD3? (CD247), and a T-cell receptor (?? or ??) heterodimer. It is found on all mature T lymphocytes, NK-T cells, and some thymocytes. CD3, also known as T3, is a member of the immunoglobulin superfamily that plays a role in antigen recognition, signal transduction, and T cell activation.
