## **Technical Data Sheet**

Biotin Anti-Human CD21

Catalog Number: 108903, 108904

Size: 25 ug, 100 ug

Target Name: CD21, Complement C3d receptor (C3dR), complement receptor 2 (CR2),

Epstein-Barr virus receptor Regulatory Status: RUO

### **Product Details**

Clone: THB5
Application: FC
Reactivity: Human
Format: Biotin

**Isotype:** Mouse IgG2a **Antibody Type:** Monoclonal

Formulation: Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v)

BSA

Protein Concentration: 0.2 mg/mL

Storage and Handling: The antibody solution should be stored undiluted between 2°C and 8°C, and

protected from prolonged exposure to light. Do not freeze.

**Recommended Usage:** For flow cytometric staining, it is recommended to use less than 0.1 ug of this reagent per 0.5-1.0 million cells in a 100  $\mu$ L volume. Optimal reagent performance should be

determined by titration for each specific application

## **Background Information**

Complement receptor type 2 (CR2), also known as complement C3d receptor, Epstein–Barr virus receptor, and CD21 (cluster of differentiation 21), is a protein that in humans is encoded by the CR2 gene. CR2 is involved in the complement system. It binds to iC3b (inactive derivative of C3b), C3dg, or C3d.[5] B cells express CR2 on their surfaces, allowing the complement system to play a role in B-cell activation and maturation.
