

Technical Data Sheet

Biotin Anti-Human CD45RA

Catalog Number: 109403, 109404

Size: 25 ug, 100 ug

Target Name: CD45RA, GP180, LY5, LCA, PTPRC

Regulatory Status: RUO

Product Details

Clone: HI100

Application: FC

Reactivity: Human

Format: Biotin

Isotype: Mouse IgG2b

Antibody Type: Monoclonal

Formulation: Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) BSA

Protein Concentration: 0.2 mg/mL

Storage and Handling: The antibody solution should be stored undiluted between 2°C and 8°C, and protected from prolonged exposure to light. Do not freeze.

Recommended Usage: For flow cytometric staining, it is recommended to use less than 0.05 ug of this reagent per 0.5-1.0 million cells in a 100 µL volume. Optimal reagent performance should be determined by titration for each specific application

Background Information

CD45RA is a 205–220 kDa isoform of the CD45 tyrosine phosphatase, expressed on naive/resting T cells, medullary thymocytes, B cells, and monocytes. It is found on ~40–50% of peripheral CD4+ T cells, ~50% of CD8+ T cells, and subsets of B cells and monocytes. CD45RA enhances TCR and BCR signaling and associates with molecules like LPAP, CD1–CD4, and galectin-1. Its expression is regulated by cytokines and can be present on some activated T cells. CD45RA-specific antibodies (e.g., HI100) are widely used to identify naive T cells and study CD4+ suppressor/inducer subsets.

Product Data

Human peripheral blood lymphocytes stained with biotinylated Anti-Human CD45RA clone HI100 (blue histogram) or an isotype control (gray histogram), followed by SA-PE.
