

Technical Data Sheet

Anti-Mouse CD3

Catalog Number: 200101, 200102
Size: 100 ug, 500 ug
Target Name: CD3, T cell antigen receptor complex, T3
Regulatory Status: RUO

Product Details

Clone: KT3
Application: FC
Reactivity: Mouse
Format: Purified
Isotype: Rat IgG2a
Antibody Type: Monoclonal
Formulation: Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide
Protein Concentration: 0.5 mg/mL
Storage and Handling: Store the antibody undiluted at 2°C to 8°C.

Background Information

CD3 (cluster of differentiation 3) is a protein complex and T cell co-receptor that is involved in activating both the cytotoxic T cell (CD8+ naive T cells) and T helper cells (CD4+ naive T cells). CD3 is a member of the Ig superfamily and primarily expressed on T cells, NK-T cells, and at different levels on thymocytes during T cell differentiation. CD3 is composed of CD3 ϵ , δ , γ and η chains. It forms a TCR complex by associating with TCR α/β or γ/δ chains. CD3 plays a critical role in TCR signal transduction, T cell activation, and antigen recognition by binding the peptide/MHC antigen complex
