

Technical Data Sheet

Biotin Anti-Human CD19

Catalog Number: 101205, 101206
Size: 25 ug, 100 ug
Target Name: CD19, B4, CVID3, MGC12802
Regulatory Status: RUO

Product Details

Clone: 019AM2b
Application: FC
Reactivity: Human
Format: Biotin
Isotype: Mouse IgG2b
Antibody Type: Monoclonal
Formulation: Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) BSA
Protein Concentration: 0.2 mg/mL
Storage and Handling: The antibody solution should be stored undiluted between 2°C and 8°C, and protected from prolonged exposure to light. Do not freeze.
Recommended Usage: For flow cytometric staining, it is recommended to use less than 0.1 ug of this reagent per 0.5-1.0 million cells in a 100 µL volume. Optimal reagent performance should be determined by titration for each specific application

Background Information

CD19 is expressed in all B lineage cells. CD19 is a 95 kd Type I transmembrane glycoprotein in the immunoglobulin superfamily (IgSF) with two extracellular C2-set Ig-like domains and a relatively large. CD19 plays two major roles in human B cells: on the one hand, it acts as an adaptor protein to recruit cytoplasmic signaling proteins to the membrane; on the other, it works within the CD19/CD21 complex to decrease the threshold for B cell receptor signaling pathways. Due to its presence on all B cells, it is a biomarker for B lymphocyte development, lymphoma diagnosis and can be utilized as a target for leukemia immunotherapies.

Product Data

Human peripheral blood lymphocytes stained either with biotinylated anti-human CD19 clone 019AM2b (blue histogram), followed by SA-PE.
